# Business Intelligence – The Business of Knowing Your Business

ONINDUS' BUSINESS INTELLIGENCE WILL TRANSFORM YOUR DATA TO KEY BUSINESS INSIGHTS

To truly understand how any capital improvement project is performing organizations need access to data from various systems and sources. OnIndus' Business Intelligence service will transform your data into key business insights empowering you to avoid risk and improve the performance of all your programs.

The construction industry has been slow to adopt technology to improve outcomes and reduce the risk of programs. However, the resistance to change and modernization has also crippled leaders and key stakeholders in having complete visibility to plan and predict key trends and risks to their programs.

Data should tell a story based on relevant background, live facts and then deliver the "what's next" answer everyone needs to make sound decisions.

BUSINESS AUTOMATION

SYSTEM INTEGRATION

PEOPLE, CHANGE & 7Rs

BUSINESS INTELLIGENCE

Projects are complex & involve a lot of moving parts. To truly understand how any project is performing organizations need access to data from various systems & sources.

With the INTEL road-map, organizations are empowered with data to make sound decisions on their programs.

| I	N	T	E	L
Inquire about what decisions you need to make	Now, ask what data points are needed to make the decisions	Thorough understanding where the data resides (ie what are the source systems)	Establish & understand how the data is being pulled and aggregated	Leverage the data through design and deliver (distribute) reports in real-time
